DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, drawn to claims 1 through 10, in the reply filed on May 2, 2005 is acknowledged.
2. Claims 11 through 30 are hereby withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention or inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 2, 2005.

Drawings

3. The drawings are objected to because the line quality of the reference characters and the lead lines in the drawings is not uniform and is generally poor, as is the line quality of Figures 18 and 22 in their entirety. Figures 1, 15, and 19 appear to be copies of photographs (see below). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3753

4. Color photographs and color drawings are not accepted unless a petition filed under 37 CFR 1.84(a)(2) is granted. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and, unless already present, an amendment to include the following language as the first paragraph of the brief description of the drawings section of the specification:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings and black and white photographs have been satisfied. See 37 CFR 1.84(b)(2).

Specification

5. The abstract of the disclosure is objected to because it does not avoid using phrases which can be implied, i.e., "is described". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1 through 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Enersyst Development Center, L.L.C. (WO 00/54641).

Enersyst Development Center, L.L.C. discloses a refrigeration-rethermalization food service system essentially as claimed, including for example: a cart 1 and a docking station 2, wherein the cart comprises a housing with at least one door 14, a plurality of wheels or casters 7, a vertically oriented cold air plenum or duct 255, a vertically oriented hot or cold air plenum or duct 356, at least one baffle 550 in the hot or cold air plenum or duct 356, at least one baffle 65 for directing air flow within the cold air plenum or duct 255, a plurality of trays 80, and, a thermal partition or barrier 8, and wherein the docking

Art Unit: 3753

station comprises a cold air supply system including a fan/blower 247 and a refrigeration system including an evaporator 290 and a compressor and/or condenser 291, as well as a hot air supply system including a fan/blower 63 and a heater 61. One or more seals are provided between the apertures connecting the docking station and the front of the cart as noted in lines 27-28 on page 7 of the reference.

The reference thus reads on the claims.
